TITLE: REINFORCED DESIGN OF BATHROOM WALL MOUNTED RACK CONNECTOR

Preliminary Amendment: CLAIM AMENDMENTS

1. (Currently amended) A bathroom wall mounted rack comprising:

a mount; with a wall end as one end; ~~Holes are and having frame holes set on the wall~~
mount thereon and in the a center thereof, one frame is being perforated to the wall end;

a fillister; installed on two opposite sides of the wall end of wall mount and the frame
holes;

a frame, without fixed pattern and the; wherein connector ends of said frame just go
through the frame holes on the frame in the center of wall mount; and

a through hole, set on the connector ends of frame in the condition of radial
transfixion. ~~The~~, two ends of through hole are being positioned corresponding to the fillisters of wall
mount; and

a bolt, ~~going~~ extending through the through hole of frame connector end. ~~The~~, having
two ends ~~protrude~~ protruding on two sides of frame connector ends and further ~~embed~~ embedding
into two fillisters of wall mount correspondingly so as to connect and fix the frame and wall mount.

2. (Original) The wall mounted rack defined in Claim 1, wherein said fillister is in a space structure of sideling taper with two side walls.

3. (Currently amended) The wall mounted rack defined in Claim 1 ~~or 2~~, wherein said bolt is in a structure of hollow tube with C-shape cross section, which makes the outside diameter of the bolt elastic so as to be fixed in the fillister tightly.
